20+ years across UK & EU medicinal product safety

Keeping patients safe after licensing — a pharmacovigilance system that works: maintained master files, implemented risk minimisation, clean safety data exchange and audit trails that stand up to inspection.

AFFILIATE PV SYSTEMS & GOVERNANCE

- UK National Contact Person (NCP) — MHRA-facing; supporting UK QPPV (EU resident) oversight
- UK PSMF & EU PSMF maintenance — appendices, version control & compliance records
- Affiliate PV framework co-developed with UK QPPV — National & MRP; products in 18+ markets
- SDEA & technical-agreement governance; third-party service providers oversight
- GVP Module II alignment; MHRA Exceptions & Modifications (post-Brexit)

RMP & RISK MINIMISATION

- Product-specific UK RMPs — branded & generic licences
- Risk-minimisation measures — implementation & monitoring
- Safety wording aligned across SmPCs, PILs & labelling
- Safety variations & lifecycle alignment
- Targeted follow-up questionnaires; literature surveillance & signal awareness

PV OPERATIONS & INTERFACES

- PV/MI interface by design — adverse-event escalation & quarterly reconciliation
- ICSR management procedures & escalation
- Adverse-event enquiry management (patients, carers & healthcare professionals)
- MHRA Yellow Card scheme processes
- Cross-functional safety governance

AUDIT, TRAINING & INSPECTION READINESS

- PV audits end-to-end — planning, coordination, reports & CAPA
- PV SOP frameworks (7+ SOPs authored)
- Inspection readiness & compliance monitoring
- Baseline & ongoing PV training; MHRA portal procedures
- Product-recall coordination & internal audits
